-  Oil
- Dye-sublimation

Make your own practical test to be sure it reaches your quality standard. For all- and latest information see our Compatibility List.

**Printing guidelines**

Max. temperature (material) should not exceed 80°C as overheating can impair the flatness of the media. Ink restrictions and heater settings have to be set for specific printer ink combinations to obtain the best results.

**Colour profiles**

AR graphix develops high quality ICC colour profiles for the divers printing media's. We work with specialists that can do this service for almost every printer - rip combination

**Storage conditions**

1 year under normal conditions (10–25°C at a relative humidity of 30–75 %). Higher humidity and/or temperature can affect the product performance. Always store the media in a dark place.

**Environment**

The media and final prints can be disposed of as vinyl waste. Material is suitable for recycling. Please consult local recycle resources. For treatment of ink or ink residue, please refer to your printer manual or supplier.
